

OBJECTIVE

I am a passionate Computer Science undergraduate with strong foundations in Machine Learning, Data Science, Algorithms, and Software Engineering. Experienced in building data-driven applications using Python and modern software technologies. Interested in AI, machine learning, and developing scalable solutions for real-world problems

EDUCATION

- **Chaitanya Bharathi Institute of Technology** CGPA: 9.15 2023 – Present
B.Tech in Computer Science and Engineering
- **Narayana Junior College** Percentage: 98% 2021 – 2023
Board of Intermediate Education, Telangana

PERSONAL PROJECTS

GlobeTrek – AI Travel Guide Personalized Tour Planner React.js, Node.js, Express.js, MongoDB

Built a full-stack travel planning platform that generates personalized travel itineraries and recommends destinations based on user preferences and interests. Developed secure authentication and user management features using JWT and MongoDB. Implemented custom itinerary generation algorithms to create structured day-wise travel plans and integrated web scraping modules to fetch destination details, travel highlights, and recommendations dynamically. Designed RESTful APIs using Express.js and built a responsive React.js interface for a seamless user experience.

Music Recommendation App Python, Pandas, Scikit-learn, Flask

Developed a Music Recommendation App using machine learning techniques to generate personalized playlists based on user preferences and listening patterns. Implemented collaborative and content-based filtering models using Scikit-learn, along with TF-IDF vectorization and cosine similarity for accurate song recommendations. Built a Flask-based interface that allows users to search songs, explore genres, and receive instant recommendations with improved recommendation accuracy and faster response time.

Job/Internship Finder Portal Python, Flask, BeautifulSoup, SQLite

Developed a Job/Internship Finder portal using Flask, BeautifulSoup, and SQLite to aggregate opportunities from multiple job boards. Implemented automated web scraping pipelines to collect job details such as company names, roles, locations, and application links. Added keyword-based search and filtering features for efficient job discovery and built a responsive user interface for students and job seekers. Optimized scraping workflows to reduce duplicate entries and improve data processing efficiency.

TECHNICAL SKILLS AND INTERESTS

- **Languages:** JavaScript, Python, Java, SQL, HTML, CSS
- **Frameworks & Libraries:** React.js, Node.js, Express.js, Bootstrap, Pandas, Scikit-learn, Flask
- **Databases:** MongoDB, SQL
- **Core Concepts:** Data Structures & Algorithms, Machine Learning, Data Analysis, Object-Oriented Programming, Operating Systems, Computer Networks, Software Engineering
- **Tools & Platforms:** Git/GitHub, VS Code, Postman
- **Soft Skills:** Problem-Solving, Analytical Thinking, Communication, Teamwork

ACHIEVEMENTS

- Scored 97 percentile in JEE Main 2023, ranking among top engineering aspirants nationally.
- Completed NPTEL certification in Data Science with 78% score.
- Solved **300+ coding problems** across platforms (LeetCode, HackerRank).
- Selected as a Contributor at GirlScript Summer of Code (GSSoC '25).
